

West Georgia Technical College Foundation's

GAP FUNDING PROGRAM

What Is Gap Funding?

For many students, not having the funds to cover the full cost of attendance means the difference between continuing their education or dropping out of school.

Our Gap Funding Program is designed to “bridge the gap” in a student’s ability to fully fund his or her education at West Georgia Technical College, and it ensures that students who need financial assistance have the resources to continue their education.

Established in 2018 by the West Georgia Technical College Foundation, the Gap Funding Program is a reserve fund that provides students who are in need with short-term financial assistance to help pay for the cost of attendance or to assist with educational expenses and more.

Your Support Matters

More than 700 students have benefited from our program. Your contribution will help us to provide assistance to many more, making it possible for them to complete their degree.

Make A Donation

Every donation makes a difference in helping a student earn their degree. To learn more or to make a donation, visit westgatech.edu/gap-fund/.
